

ROMAN GUSEVSKI

SENIOR FRONT-END DEVELOPER

Polotsk, Belarus · Open to remote / relocation

SUMMARY

Senior Front-End Developer with 9+ years building production web applications for international clients across the US, UK, Sweden, and Brazil. Deep expertise in the React (Next.js, Redux, GraphQL) and Angular (NgRx/NGXS, RxJS) ecosystems, with hands-on experience architecting features from scratch, leading front-end teams, and shipping AI-driven functionality. Comfortable owning a codebase end-to-end — from architecture decisions and code-quality standards to mentoring and cross-team review.

EXPERIENCE

Cvent — Senior Front-End Developer

03.2023 – Present

via Trembit (outstaffing) · United States · event-management & attendee-engagement software

- Design and build new product features from scratch, including AI-assisted functionality that reduces manual logic and development effort
- Own architectural decisions for new modules built on Next.js 13/14 and Node.js
- Work in a partly full-stack capacity across a 6-person front-end team, balancing performance and maintainability
- Audit and refactor existing code paths to reduce technical debt and stabilize releases
- Run cross-review for the front-end team, raising the code-quality bar across the codebase
- Use AI coding tools (Claude Code, GitHub Copilot) as part of the daily workflow over the past year, speeding up implementation and code review

Stack: React, Redux, Next.js 13/14, SASS, Styled Components, Emotion, Node.js, REST API, Claude Code, GitHub Copilot

Learnster — Senior Front-End Developer

01.2022 – 03.2023

via Trembit (outstaffing) · Sweden · AI-driven learning-management platform (LMS)

- Delivered features across 3 concurrent workstreams on a large, multi-module LMS platform
- Built a shared library of reusable components, forms, and controls adopted across the platform, cutting duplicate work for the rest of the front-end team
- Partnered with backend engineers on Python-driven services to ship end-to-end features

Stack: Angular, SCSS, NGX-Bootstrap, RxJS, Python, REST API

Dashworks — Senior Front-End Developer & Team Lead

05.2020 – 01.2022

via Yotec · United Kingdom · enterprise IT-management & automation platform · concurrent full-time engagement (see Rockspoon below)

- Led a front-end sub-team within a 14-person front-end org, owning technical decisions and code-style standards used across the whole team
- Introduced and owned ESLint/Prettier standards as code-style champion, raising consistency across a codebase built by 14 front-end engineers
- Built and maintained a reusable component/control library used across multiple product areas
- Ran Scrum ceremonies and worked directly with 8 QA/AQA engineers to stabilize releases
- Built unit test coverage from scratch across the codebase, taking it from 0% to 99%, since none existed beforehand

Stack: Angular, SCSS, Angular Material, RxJS, NGRX, C#, REST API, Storybook, Jest, Istanbul/nyc

Rockspoon — Senior Front-End Developer

05.2020 – 01.2022

via ITechArt (outstaffing) · Brazil · POS & restaurant-management software · concurrent full-time engagement (see Dashworks above)

- Worked across all active projects at the client, building core POS functionality end-to-end
- Designed and built reusable components, controls, and form libraries reused across a 6-person front-end team
- Owned tricky business-logic features end-to-end, from architecture to stabilization

Stack: Angular, NGXS, RxJS, Angular Material, Go, REST API

iStarMap — Front-End Lead

05.2019 – 05.2020

via ITechArt (outstaffing) · Belarus · internal HR platform for skills & project tracking

- Acted as front-end lead on a 4-developer team, owning technical direction end-to-end
- Architected the client-side application using React and Apollo GraphQL from the ground up
- Directed code-quality reviews and framework decisions for the rest of the front-end team

Stack: React, CSS-in-JS, Apollo Client, Redux, GraphQL, Material UI, Docker

Andersen — Front-End Developer

10.2016 - 03.2019

Belarus / Russia · direct employer · onboarding + 5 client engagements

Indusoft (Russia, 06.2018–03.2019) — migrated a desktop production-control tool to the web

Cislink / Vetflow (Russia, 03.2018–03.2019) — built e-document workflows for veterinary clinics

Cislink / EDI Trading Platform (Russia, 10.2017–03.2018) — built a B2B trading platform for retail EDI

Cislink / Doclink (Russia, 05.2017–10.2017) — built legal e-document exchange tooling

UNESCO (France, 03.2017–05.2017) — built internal travel-request tooling, wrote e2e test coverage

Stack: JavaScript, TypeScript, Angular/AngularJS, RxJS, jQuery, KnockoutJS, AG-Grid, HTML, CSS/LESS

KEY TECHNOLOGIES

Languages: JavaScript, TypeScript

Frameworks: React, Next.js, Angular

State Management: Redux, Redux-Saga, NgRx, NGXS, Apollo Client, RxJS

Styling: SCSS/SASS, LESS, Styled Components, Emotion, CSS-in-JS, Material UI, Bootstrap

API / Data: REST API, GraphQL, Node.js

Testing & Tooling: Jest, Storybook, Istanbul/nyc, ESLint, Prettier, Webpack, Protractor

AI Tools: Claude Code, GitHub Copilot, ChatGPT

Other: Docker, Git, Agile/Scrum

EDUCATION

Polotsk State University — Degree in Information Technologies

LANGUAGES

English — B2+

Russian — Native (C2)
